ISO 9000 Certification at Reifen Recycling Rhede

The ISO 9000 certificate has been granted to the company Reifen Recycling Rhede GmbH, Butenpass 17, 46414 Rhede, GERMANY.

This certifies that the quality system of Reifen Recycling Rhede GmbH meets all the strict requirements in accordance with ISO 9000.

In order to make sure that our products can fulfil all demands made on our customers' as well as our part, we have set up a system in which all business processes, which may have an impact on quality, are scheduled, controlled and supervised continuously. Thus we can also inform you about improved packaging, identification of the Big Bags as well as quality assurance.

For example, two reference samples from each individual Big Bag are taken during the filling process. One of the samples is added to the document cover, while the other one remains for evidence at Reifen Recycling Rhede GmbH. In addition, coloured cardboard cards marked with date of production and net weight are added to the Big Bags (green: 0.8 - 2 mm, blue: 2 - 4 mm, red: 0 - 0.8 mm, orange: 0.6 - 2 mm, yellow: 0 - 0.6 mm).

Immediate Inspection of Reference Samples on Delivery:

We ask you to check the enclosed reference samples on the spot after the delivery of the rubber granules to the building site or your production plant. Any complaints with regard to the quality of granules can only be accepted prior to the processing of the Big Bags.

Due to the matching identifiers, the reference samples can be easily be assigned to the corresponding Big Bag. In case of any valid quality complaint, a Big Bag can be replaced prior to the processing.

SGS

Zertifikat NL08/27593918
Das Management-System von:

Reifen Recycling Rhode GmbH

NL/REC 386634
Butenpaß 17
D-46414 Rhode, Deutschland
